MOLI Audit Log

verifiable traceability across every change in the system

Know who changed what, when — without asking anyone.

Every change to every record is logged automatically — who, what, when, where, and how.

When it's time for an audit, you're ready. No scrambling, no gaps, no exceptions.

HOW IT WORKS

On every Add, Edit, or other key change to information in the system, MOLI logs who made the change and what the change was, including the full context: their browser, IP address, and other key metadata.

Administrators can review and export audit log data to provide evidence of changes made.
