MOLI Files, Photos, and Videos

hundreds of formats in, standardized and searchable out

Upload almost anything — MOLI converts, thumbnails, indexes, and makes it usable.

From decades-old WordPerfect® files to this morning's Microsoft Word® Documents — photos, images, drawings, and videos — MOLI normalizes your content library without losing anything.

Embed and link content throughout the system and breathe new life into old files.

MOLI's intelligent file processing subsystem preserves accessibility regardless of format or age. The system automatically converts hundreds of file types to standardized formats, generates thumbnails for quick recognition, and enables robust search capabilities across all content. Video and audio files receive automatic transcoding and subtitle support, ensuring critical information remains accessible even in noisy environments.
