MOLI Jobs

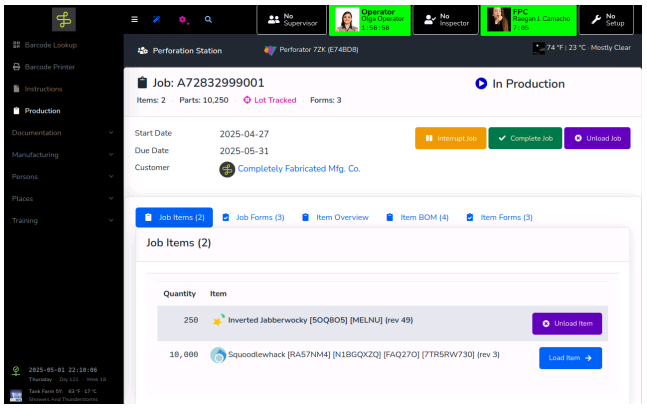

production execution that maximizes throughput

Digital Job Travelers. Done Right.

Jobs flow from your ERP into MOLI automatically — no manual creation, no data entry lag.

As team members interact with a job, MOLI delivers required training, work instructions, and data entry forms dynamically based on role and context.

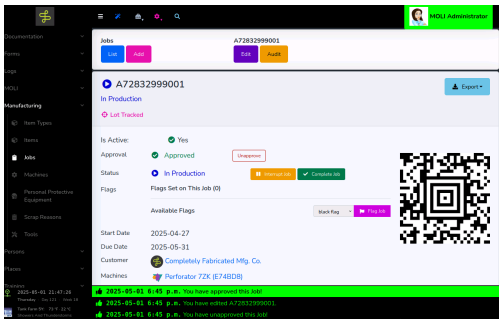

The Job Pack Export captures every interaction — who did what, when, and on which revision.

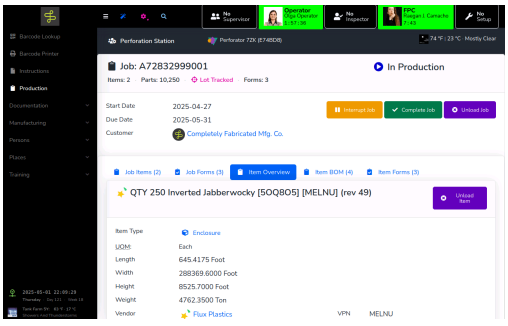

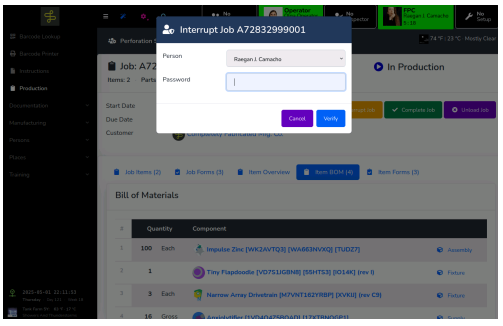

HOW IT WORKS

- **Create Jobs** in MOLI, either manually or automatically with a **MOLI ERP Integration**.
- **Attach Items** to the Job. Forms, Instructions, Assessments, and documentation from the Item load automatically.
- **Attach Content** to the Job: Forms, Instructions, Assessments, Files, Photos, and Videos.
- **Operators load the Job** on the Kiosk — receive documentation — and enter production and quality data.
- As the job is executed, **review progress with MOLI Digital Signage and MOLI Data Exports**.
- Job Data can **sync back to supported ERP Systems**, or be exported automatically to the MOLI Folder or to any supported MOLI Document Management System Integration.
