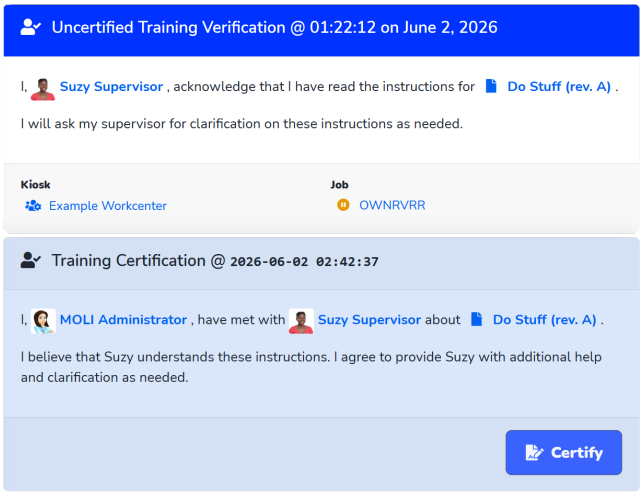
MOLI Training Verifications

electronic acknowledgment and certification of training

No More Manual Sign-Off Sheets. Automated Records. Right at the Workcenter.

Every time an operator reads a new revision of instructions, MOLI prompts them to confirm. That confirmation is an electronic signature, timestamped and tied to the specific revision, operator, kiosk, and job.

When your quality system requires a second signature, a supervisor certifies the record directly at the kiosk. Two authentications, one permanent record, zero paperwork.



MOLI Training Verifications replace manual sign-off sheets entirely, with detailed records and electronic signatures that satisfy audit requirements across regulated industries.

Camera behavior at verification and certification events is independently configurable — none, automatic snap, prompted photo, or both — for environments where photographic evidence of the event is required.

MOLI Digital Signage Integration

All uncertified training records appear on the "Uncertified Training" Digital Signage panel.

MOLI Smart Stacklight Integration

When training is uncertified at a workcenter, its stacklight color pattern includes **BLUE**.

Email Integration

MOLI can send hourly emails listing all uncertified training verifications — to shift supervisors, a list of additional recipients, or both.
