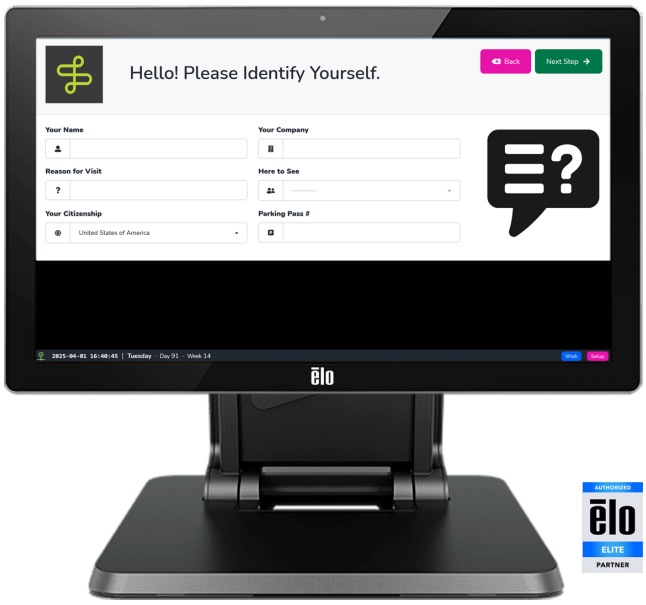
# MOLI Visitor Kiosk

**self-service visitor management — welcoming, compliant, and wired in**



## Every Visitor. Welcomed and Documented.

A clipboard on a reception desk tells you a name and a company.

A MOLI Visitor Kiosk tells you citizenship, NDA status, the host who was notified, the photo on the badge, and the exact moment that person walked in — with a timestamped record to prove it.

From ITAR compliance to evacuation headcounts, MOLI connects visitor sign-in to the systems that need to know. The right welcome, the right paperwork, the right notification — automatically, every time.

## MOLI VISITOR SIGN-IN FLOW

**Welcome**
Customizable greeting and instructions set the tone.

**Citizenship**
Collect for ITAR or other export-control compliance.

**Paperwork**
Sign NDA, safety acknowledgment, or any configured document.

**Photo**
Visitor photo captured at the kiosk — with or without badge.

**Badge**
Print a visitor badge — with photo, name, date, barcode.

**Notify**
Host, or whole team — email, SMS, voice call or page.

## KEY CAPABILITIES

### Visitor Paperwork & eSignature
NDAs or any other documents can be presented and signed at the kiosk. Signatures and acknowledgments stored with the visitor record and exportable for audit.

### ITAR & Export Compliance
Citizenship is collected at sign-in and stored with the visitor record — giving facilities with ITAR or other obligations a documented, auditable checkpoint.

### Host & Team Notifications
The moment a visitor begins sign-in, MOLI notifies the designated host — or the whole team — via email, SMS, voice call, or overhead page. No one left waiting.

### Visitor Photo & Badge Printing
Capture a visitor photo at sign-in. Print badges to any connected label printer — with photo, name, company, date, and a barcode for sign-out.

### MOLI Digital Signage Integration
Visitor activity flows directly into the **Headcount** Digital Signage — real-time attendance visible facility-wide, streamlining evacuations.

### Coexists with MOLI Timeclock
The Visitor Kiosk and Timeclock can run on the same physical device — handling visitor sign-in and employee clock-in without compromise or conflict.

## WHY NOT A PAPER LOGBOOK — OR AN IPAD?

| | PAPER LOGBOOK | IPAD + APP | MOLI VISITOR KIOSK |

**About that iPad in your lobby...**

Consumer tablets deployed as kiosks depend on Mobile Device Management profiles and Apple's certificate infrastructure to stay locked down. When those certificates lapse — or when connectivity hiccups prevent verification — the kiosk greets your next visitor with *"Guided Access app unavailable. Please contact your administrator."* — and then dumps them to the home screen. MOLI runs on purpose-built industrial touchscreens under EloView®, a managed OS environment with no consumer app store in the chain. The MOLI Visitor Kiosk does its job on day one and on day one thousand.

## MOLI CERTIFIED KIOSK DEVICES & PERIPHERALS

| FIXED KIOSK | FIXED KIOSK | FIXED TABLET | FIXED TABLET | SCANNER | PRINTER |
|---|---|---|---|---|---|
| **Elo I-Series 5 21.5"** | **Elo I-Series 5 10.1"** PREFERRED | **Samsung Galaxy A9** | **Samsung Active5 Pro** | **Elo Edge Connect** PREFERRED | **Zebra ZD220 / ZD230** PREFERRED |

Badge printing requires a connected Zebra printer. Sign-out scanning works with any attached Zebra scanner, the Elo Edge Connect barcode module, or the device camera for low-volume workflows. The MOLI Visitor Kiosk and MOLI Timeclock can share a single device with no additional licensing cost.
