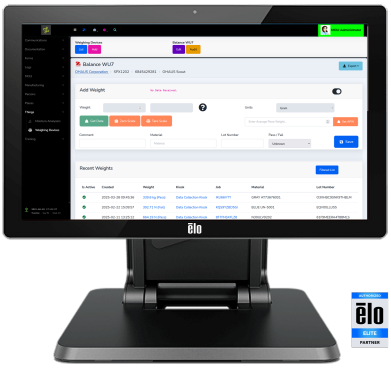
MOLI Weighing and Scales

weight data captured at the source, organized by job, material, and device

No transcription errors. No paper. Just accurate weight records tied directly to the job.



Built-In Digital Weighing

MOLI interfaces directly with supported weighing devices — including OHAUS Scout hardware — creating Weight Logs automatically with pass/fail recording and comments.

Weighing operations with analog scales are fully supported in the same interface.

HOW IT WORKS

MOLI Kiosks connect to supported weighing devices over USB or RS-232 Serial and provide an on-screen interface to zero and tare the scale, get the weight, and set various scale options including units and mode.

Weights can be saved to the Weight Log and carry the full context of who, where, when, and what job was loaded. Operators can also specify a lot number, comment, and pass/fail status along with the weight.

The same interface also supports adding weights to the weight log manually, without an attached scale.

Compatible OHAUS Scout Models: SKX1202, SKX2201, SKX2202, SKX222, SKX421, SKX422, SKX6201, SKX621, SKX622, SKX8200, SPX1202, SPX2201, SPX2202, SPX222, SPX421, SPX422, SPX6201, SPX621, SPX622, SPX8200, STX1202, STX2201, STX2202, STX222, STX421, STX422, STX6201, STX621, STX622, STX8200, SJX323, SKX123, SPX123, SPX223, STX123, STX223
