MOLI Certified Devices

Tested · Compatible · Proven

A curated ecosystem of devices and information processing machines.

The Right Device.
For the Right Workcenter.

Any tablet can run a browser. Not every tablet survives a production floor — or works with gloves on.

MOLI Certified Devices are tested for compatibility, durability, and real-world performance in manufacturing environments.

Certification holds the ecosystem together: Mounts fit devices. Things don't need driver installation. Output is consistent when hardware is specified as a system

CERTIFIED DEVICE CATEGORIES

- **Industrial Touchscreen Kiosks.** Fixed-mount production floor kiosks in multiple form factors and enclosure ratings — including options for harsh environments and washdown requirements.
- **Mobile Devices.** Tablets and handhelds for mobile use cases. Ruggedized options available.
- **Digital Signage.** Players and displays.
- **Mounts... for fixed-mount kiosks** VESA standard articulating arms, pedestal stands, wall mounts, desk mounts, and specialty brackets; **for mobile devices**: enclosures, bumpers, straps, and other device-specific options; and **for digital signage** to adapt a player to a display.
- **Barcode Scanning.** Zebra handheld, fixed-mount, integrated, and direct-attach scanners; 1D and 2D capable; tested for maximum compatibility across multiple target distances and applications.
- **Label & Barcode Printing.** Zebra label printers for MOLI-generated barcodes and labels.
- **Peripherals and Accessories.** Specialized input / output devices, consumables, or other items.

✅ The Certified Device Advantage

The alternative is sourcing hardware independently — a tablet because it was available, a scanner because it was on sale, a mount because it approximately fit. Each component could work in isolation but the combination has never been tested together — and when it needs to be replaced, you're left scrambling to find an alternative that will work with your custom blend.
