ECI JobBOSS²

Integrations · ERP System

Bridge JobBOSS² to the shop floor — jobs in, transactions out, automatically.

Jobs In. Transactions Out. Nothing In Between.

Jobs and Parts flow to the shop floor automatically — operators always see current work. Labor and material transactions captured in MOLI post back to JobBOSS², closing production records without a second keystroke.

KEY BENEFITS

- Jobs and Parts sync from JobBOSS² to MOLI so operators have live, accurate work queues.
- Labor and material transactions recorded in MOLI flow back to JobBOSS² without re-keying.
- MOLI connects directly to your JobBOSS² SQL Server database via the MOLI Broker for Windows.

TECHNICAL DESCRIPTION

Bidirectional Job and Job Transaction sync between MOLI and ECI JobBOSS²® shop management software

Synced Entities: Items, Jobs, Job Transactions
