

Sage 100

Integrations · ERP System

Connect Sage 100 Work Orders to the shop floor with automatic two-way sync.

Sage 100 Work Orders on the Floor. Done Right.

The MOLI Broker for Windows connects to your Sage 100 database via ODBC, syncing Work Orders and Inventory Items to the shop floor automatically. Job Transactions recorded in MOLI write back to Sage 100 — keeping production records accurate without manual re-entry.

KEY BENEFITS

- Work Orders and Inventory Items flow from Sage 100 to MOLI so operators always have current work.
- Job Transactions recorded in MOLI write back to Sage 100 — closing the loop automatically.
- ODBC connection to the Sage 100 database runs locally via the MOLI Broker — no cloud dependency.

TECHNICAL DESCRIPTION

Bidirectional Work Order and Inventory sync between MOLI and Sage 100® (formerly MAS 90/200)

Synced Entities: Items, Jobs, Job Transactions
