Turn Xometry® Job Inventory Lists and work reports into MOLI Jobs.

Turn Xometry® Job Inventory Lists and work reports into MOLI Jobs.

Use `zomu`, a companion utility that converts Xometry® Job Inventory List PDFs into structured data, to pull individual Items — dimensions, process, technology, certifications, and BOM — directly onto a MOLI Job.

Upload Xometry®'s `current_work.csv`, `completed_work.csv`, or per-Job ZIP exports, and MOLI creates or updates the matching Jobs — Price, Finish, Material, Customer, and status included.

KEY BENEFITS

- Eliminate manual re-entry of Xometry® Job data — Price, Finish, Material, Customer, and status come through on each import.
- Pull full Item detail — dimensions, process, technology, certifications — from Job Inventory List PDFs via zomu.
- Review every change in a confirmation step before it's applied to MOLI.

TECHNICAL DESCRIPTION

Import Xometry® Jobs, Items, and files directly into MOLI with no manual re-entry.

Synced Entities: Jobs, Items, Files
